

Javelin
full-sized footprint

MagneSafe™ Mini
standard footprint

Javelin & MagneSafe Mini

For customers that want both security and ease-of-use, the Javelin and MagneSafe Mini secure card reader authenticators (SCRAs) are MagneSafe enabled and offer a reliable and convenient swipe path with complete security features for the peace of mind you can trust. Specifically designed to secure card data per PCI DSS requirements, the Javelin and MagneSafe Mini employ industry standard, Triple DES encryption and are USB powered. These bidirectional SCRAs conveniently make any existing electronic transaction more secure.

Benefits

The Javelin and MagneSafe Mini enable retailers and financial institutions to “future proof” their POS and PC-based electronic transactions that support both today’s traditional applications and tomorrow’s advanced security requirements. The Javelin and MagneSafe Mini are 100% interface compatible with all traditional MagTek readers. They give you the flexibility to activate advanced security features including card authentication, data encryption, and device/host authentication remotely when higher security is necessary.

Features

- Protects card data per PCI DSS requirements
- MagnePrint® card authentication
- Device/host authentication
- Unique, non-changeable device serial number
- Triple DES encryption
- DUKPT key management
